The first quarter of fiscal year 2015 witnessed strong growth in all key indicators with the gross loan portfolio of the sector increasing by 10.5 percent to cross PKR 70 billion.

Growth in microcredit outreach was primarily driven by the MFB peer group whose active borrowers and GLP increased by 8.8% and 12.7% respectively. In the current quarter, NRSP Bank was the largest contributor: the bank added 42,176 new borrowers and loans worth of PKR 1.6 billion - surpassing Kashf Foundation and Tameer Bank (TMFB) to become the fourth largest provider of microcredit in the sector. The bank's growth was fuelled by the agriculture sector where 44,000 new borrowers were financed for the harvest of the wheat crop. During the quarter, GLP of Khushhali bank grew by PKR 1.2 billion to exceed the PKR 13 billion mark and holds the largest market share in terms of loan portfolio (18.2%). Among the MFIs, Akhuwat saw the greatest increase by adding 39,000 new borrowers and a loan portfolio of worth PKR 627 million. During the quarter, the share of group lending methodology increased on the back of NRSP Bank which primarily relies on group lending. Overall, sector PAR (>30 days) deteriorated slightly from 1.1% to 1.7%, primarily within the MFB and RSP peer groups.

In terms of savings, the number of savers posted considerable growth of 20.1% while, on the other hand, the value of savings remained stagnant in the current quarter. The growth in the number of savers was solely driven by TMFB which added a staggering 1.85 million new depositors (an increase by 53 percent). Resultantly, the share of TMFB in terms of active depositors has increased from 41% to 52% in quarter under review. The growth in depositors by TMFB can be attributed to the surge in branchless banking activities, especially the opening of m-wallet accounts, along with increasing government disbursements for safety net programs. During the same period, the share of male savers soared from 50% to 68%, whereas, the share of urban clients grew from 48% to 59% - both were due to the increase in depositors by TMFB. The average saving balance of the sector witnessed a decline of 16.4% from PKR 5,105 to PKR 4,265, as MFBs were unable to show any significant increase in the value of deposits.

Micro-insurance also exhibited a positive trend in the first quarter of 2015 - policy holders increased by 10.8 percent while the sum insured depicted an increase of 9.9 percent. Among peer groups, MFBs were the largest contributors to micro-insurance, in terms of policy holders and sum insured, primarily on the back of NRSP Bank whose policy holders increased by 76,000 and sum insured by PKR 1.1 billion. This increase can be supported by the increase in active borrowers of NRSP Bank (mentioned above), as every new borrower (along with his spouse) is offered health insurance. Among the non-bank MFIs, Kashf was the largest contributor to policy holders by covering 172,000 new clients (mainly health coverage). Resultantly, the market share of Kashf (in terms of policy holders) increased from 15.6% to 18.2% in the current quarter.

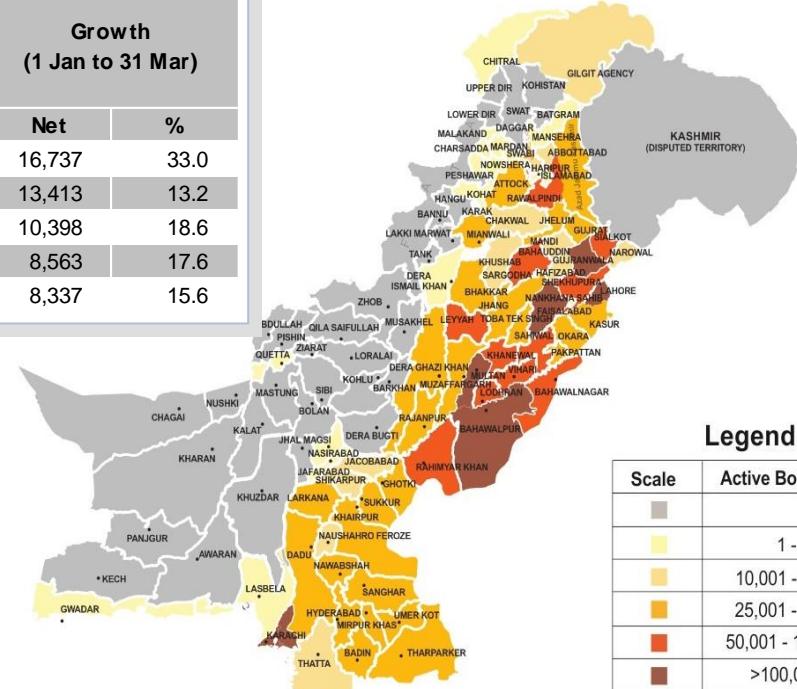

The penetration rate of the sector has increased from 11.5% to 12.1% due to an increase in overall outreach. Geographically, the number of districts covered remained the same - currently standing at 94, while the total number of branches has increased by 49. ASA, TMFB and OCT have increased their outlets, primarily in the provinces of Sindh and Punjab.

Saving Methodology:

- Intermediation:** Public deposits used to finance an organization's loan portfolio. Only SBP-regulated MFPS (CFIs and MFBs) can accept and intermediate deposits from the general public.
- Mobilization:** MFPS not regulated by SBP (MFIs, NGOs, RSPs) can neither hold nor intermediate deposits from the general public. These organizations do however mobilize savings from their members/clients to place with licensed commercial banks.
